- Moving out & Bills

#### Future Preparation

- **©** Goal Setting
- Legion Delayed Gratification
- ▼ SMART Savings
- Discovering Purpose
- M LifePathways
- ₩ Wealth Building
- Long Term Outcomes

## But bringing it into the classroom is not for the faint hearted!

#### **Developing materials**

Creating resources and organising impactful lessons takes time!

#### **Engaging students**

Making an inherently 'bland' topic engaging for students is tricky.

#### **Curriculum Fit?**

FinLit is scattered across the National curriculum. How can you justify fitting it in?

#### Responsibility confusion

FinLit fits across many subjects & year levels. Who's teaching it?

### Ensuring Impact & Effectiveness

Knowing what to teach and how effective it will be can be impossible!

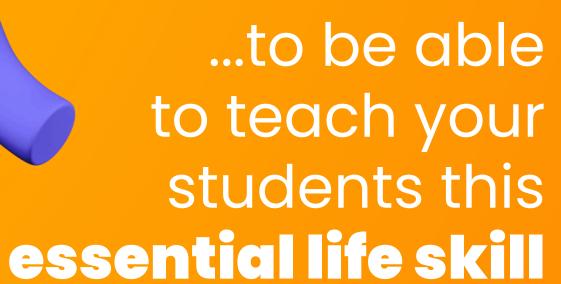

#### **Technical Knowledge**

Dealing with your own money is tough.
Teaching it can seem even tougher!

## So we decided to build a program where...

You don't need to know a **cent** about money...

# Click. Play. Money Smart.

## 80+ Hours of Ready-To-Go Financial Literacy Teaching Material

## Content is designed to fit everywhere you need it to.

Each financial concept has specialised curriculum aligned application materials to implement within...

7–10 Maths 7-10 Bus, Eco, Civics & Citizenship

Vocational Programs

7-12 Life Skills

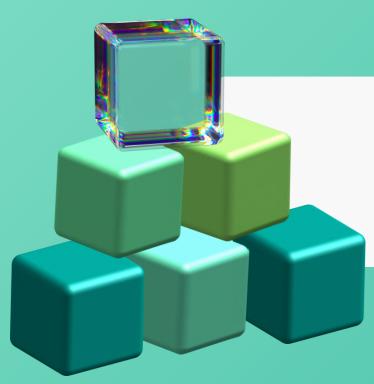

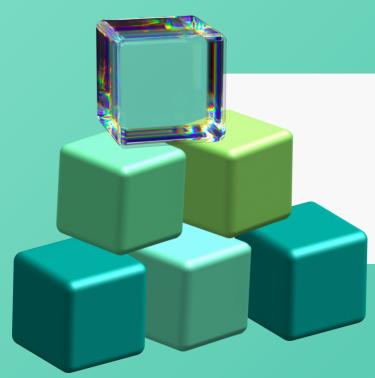

So, how does the program work?

160+ curriculum aligned learning blocks covering A-Z Personal Finance

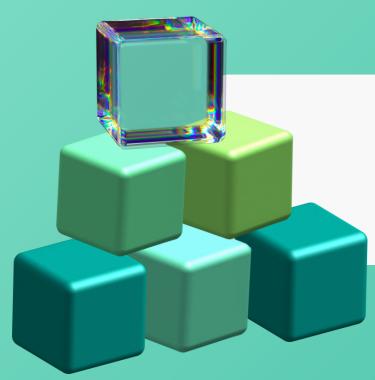

## The program is structured into 42 Lessons

160+ curriculum aligned learning blocks covering A-Z Personal Finance

Complete with theory, activities & quizzes

# Each Lesson is a complete 50-60 minute learning package...

160+ curriculum aligned learning blocks covering A-Z Personal Finance ...with flexible options to access learning & teaching materials

Complete with theory, activities & quizzes

Student + Teacher,
Digital & Print
access options

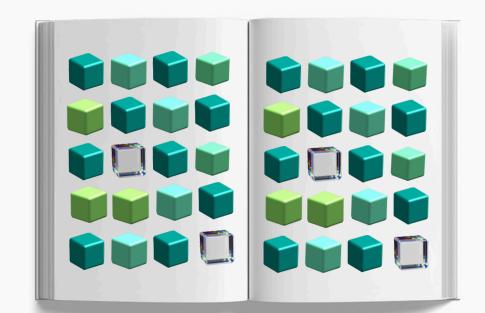

## How can I use Lessons?

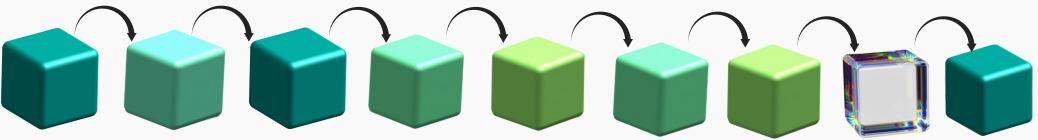

#### Use Case 1

### Build a custom Personal Finance program

Selecting from the ultimate bank of personal finance learning material, put together a program specialised to your students' interests, existing knowledge and broader school learning

objectives. Or, use our recommended learning pathway as a structure, and add enriching features to your program.

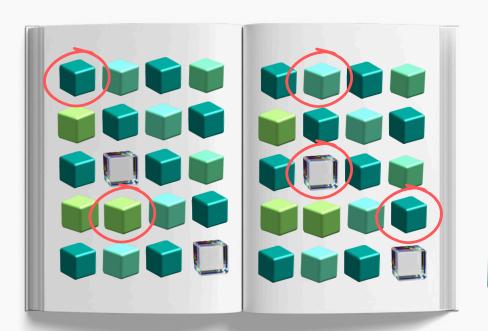

#### Use Case 2

## Strengthen existing programs or curriculum

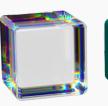

Whether you are looking to integrate financial literacy across your students' entire learning experience, wanting to connect learning

concepts to real world skills, or needing support in strengthening an existing financial literacy program... pick and choose building blocks of your choice!

#### Use Case 3

## As Adhoc exploration material

Perhaps you allow students to explore concepts independently and shape their own learning journeys. Or, perhaps it's a shared class activity, working through a single learning block at a time in idle homeroom time.

# Exactly is in a Lesson?

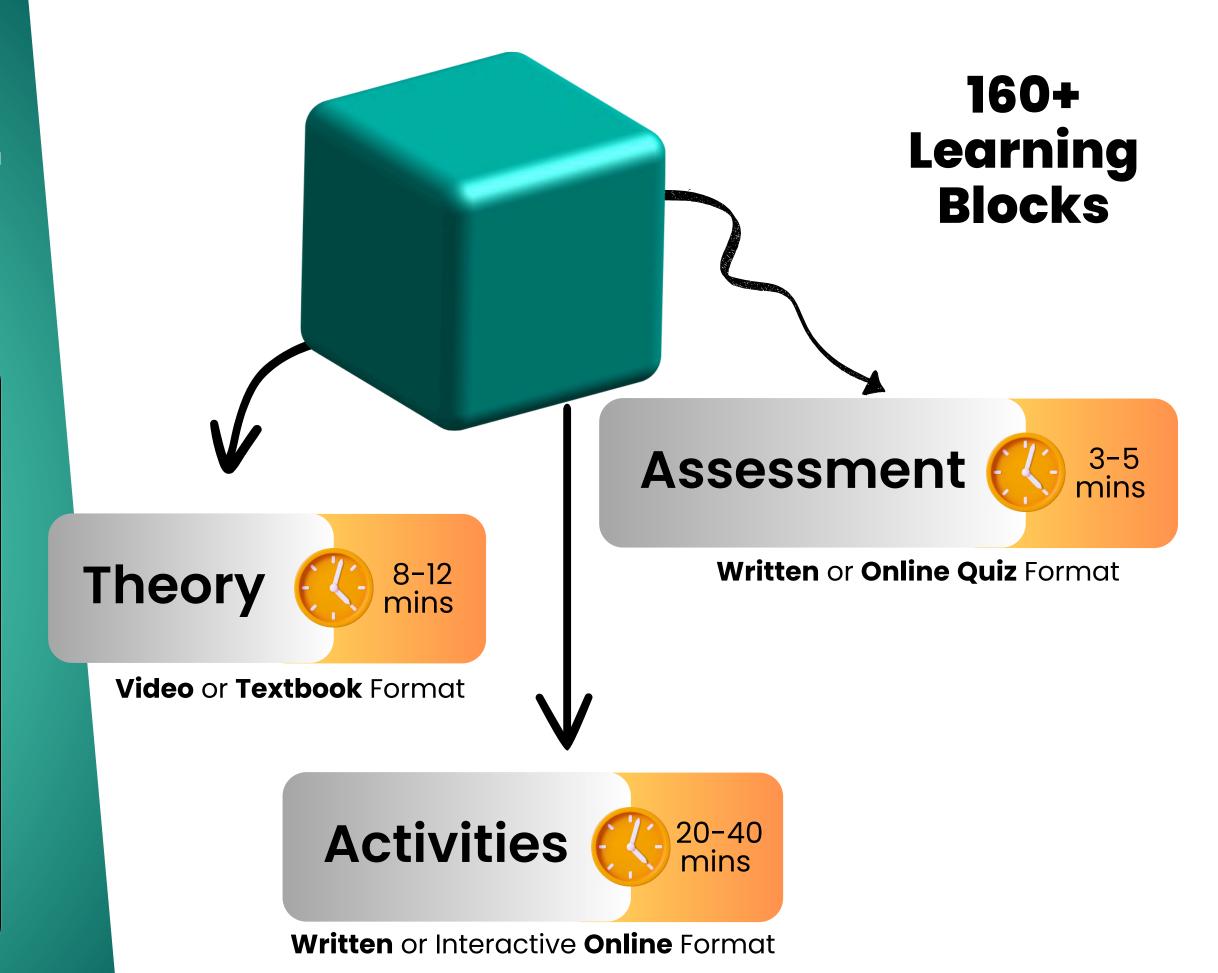

### Each Lesson tackles one major concept with 2-4 sub questions

The program covers a large range of content, which is broken down into 12 topic areas, with 168+ common questions asked by young people.

These questions form the basis of the 42 lessons, with each lesson tackling 2-4 questions...

One lesson includes:

- 8-12 minutes worth of theory
- 20-40 minutes worth of activities
- 3-5 minutes worth of assessment
